

# Introducing Clear Flush<sup>®</sup> Laparoscopic Instruments

Is your instrument as clean on the *inside* as it is on the *outside*? BOSS Clear Flush instruments have a patented internal design that facilitates removal of virtually all infectious bio-burden from “inside” the instrument with a simple 50cc flush and provides you with 100% bacteria kill on every cycle.\*

Specify Clear Flush<sup>®</sup> and reduce your patients’ risk of an HAI caused by a dirty laparoscopic instrument.

Now you can have the confidence of “disposable” instruments without the headaches and time consuming problems of “take-a-part” instruments.

## Clear Flush<sup>®</sup> is Clean on the *Inside*, Every Time.

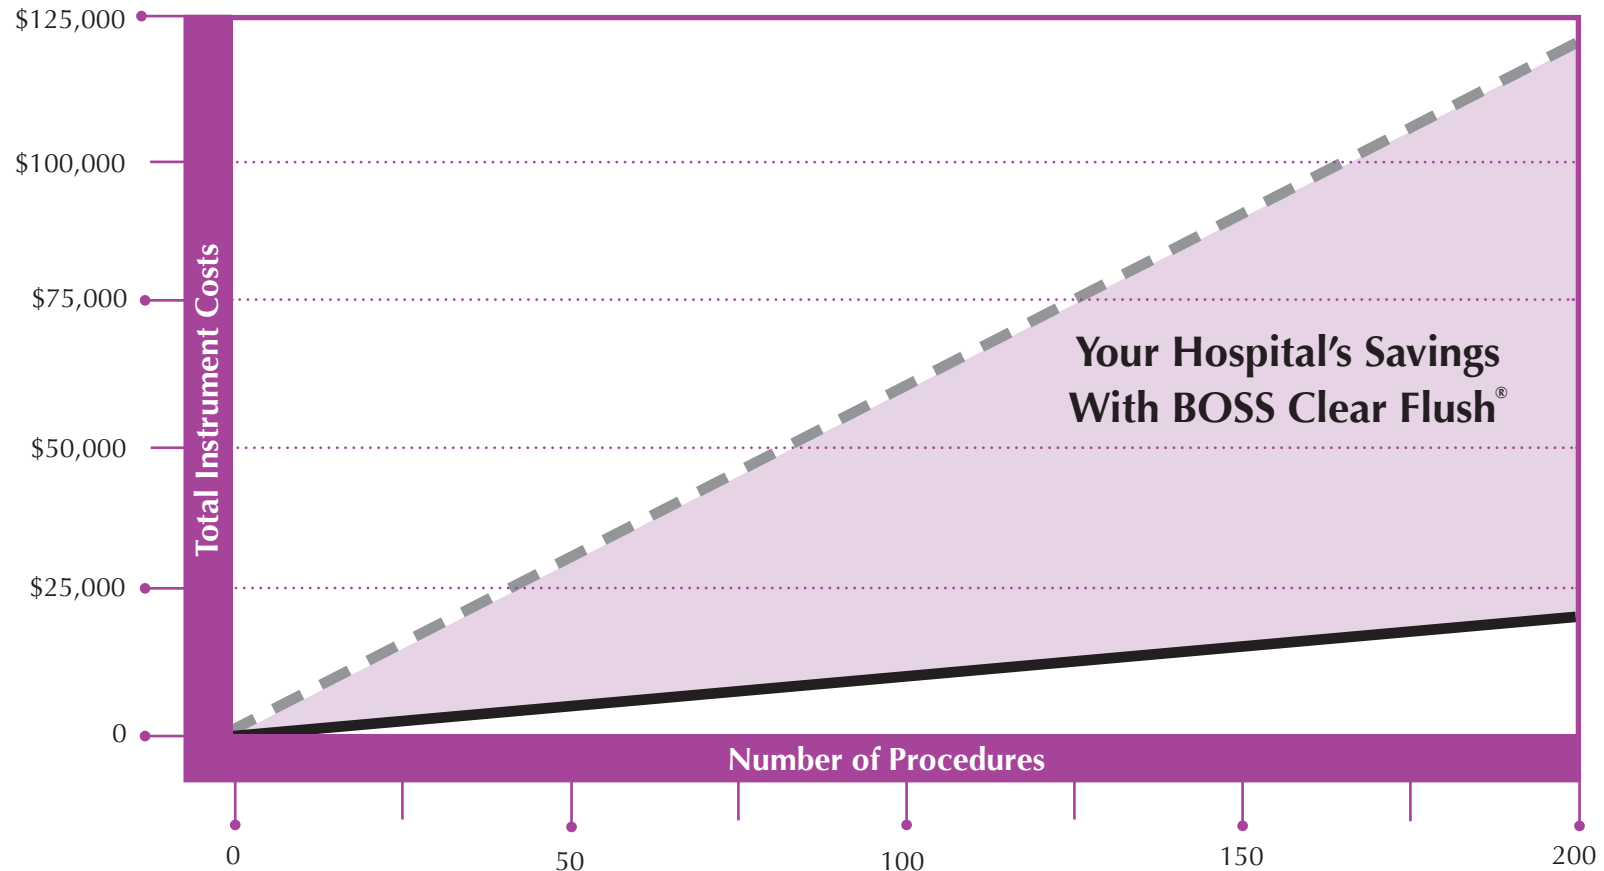

\* Validated by Independent Laboratory Testing, copies of test data on file and available.

If it's not clean, it can't be sterile!

# The Cost of Using Disposable Instruments vs. BOSS Reusable Instruments

Projected Cost Savings for Your Hospital For 200 Laparoscopic Procedures  
Using Just Seven Instruments Per Procedure

BOSS Clear Flush® Cost Savings Over 200 Procedures = **\$120,000**

Cost of BOSS Reusables ————— = \$ 20,000  
Cost of Disposables - - - - - = \$140,000  
Total Savings ————— = \$120,000

If it's not clean, it can't be sterile!
